INTRODUCTION

Over the past few years, user consumption patterns have undergone significant transformation. People have moved away from desktops and have embraced the ease and convenience of mobile devices.

As a result, video consumption on various mobile devices has seen an exponential rise, especially on smartphones. Just five years ago, adults in the US spent twice the amount of digital media time on desktop compared to mobile devices. Today, this statistic has almost completely reversed with 1.5x more media time being spent on mobile devices than desktops.

This explosion of mobile video consumption has fueled major advancements in mobile video advertising. Today’s advertisers demand increased metrics to ensure unprecedented levels of transparency and efficiency in their campaigns. By embracing video that is custom-tailored for the mobile device and also the behavior of a mobile user, advertisers are now able to achieve superior performance that only video can deliver.
This report explores the popularity and performance of mobile video ads around the world and tailors insights specifically to the Global market. At InMobi, we analyzed data from our network for 2017 (January – December). By delving deeper into mobile video consumption patterns worldwide, we were able to glean useful insights for advertisers to leverage to satisfy all types of marketing goals such as:

1. Driving awareness
2. Maximizing traffic to landing page
3. Interactions with a video ad
4. Media performance such as completion rates and Viewability metrics
METRICS THAT MATTER – MOBILE VIDEO ADS

**CLICK-THROUGH-RATE**

\[ \text{CTR} = \frac{\text{Number of Clicks}}{\text{Number of Impressions delivered}} \]

**VIDEO PLAY RATE**

\[ \text{VPR} = \frac{\text{Number of Video plays}}{\text{Number of Impressions delivered}} \]

**VIDEO COMPLETION RATE**

\[ \text{VCR} = \frac{\text{Number of Video Ads Completed}}{\text{Number of Video Ads Played}} \]

**INDEXED VIDEO CTR**

\[ \text{Indexed Video CTR} = \frac{\text{Specific Video CTR}}{\text{Global Average Video CTR}} \]

**CONVERSION PER MILE**

\[ \text{CVM} = \left( \frac{\text{Number of App Installs}}{\text{Number of Impressions delivered}} \right) \times 1000 \]

**INVALID TRAFFIC RATE**

\[ \text{IVT Rate} = \frac{\text{Impressions delivered to non-human end point}}{\text{total unfiltered impressions}} \]
Video drives growth in mobile advertising worldwide
In 2017, brands increased their spends on mobile video ads by 400% as consumer viewership grew by 550%! With increasing engagement, higher ROI and rising viewership of all things video, brands have a win-win on their hands with video ads.

VAST standards for in-app video advertising deliver 13% higher completion rates
VAST-tagged mobile video ads deliver a seamless, truly native and immersive user experience. Completion rates averaged at 63% compared to 56% over non-VAST compliant video ads.

Video ads on SDK integrated inventory delivers 2x CTR
Brand campaigns that ran on SDK-level integrated inventory, enjoy pre-cached videos which enable faster loading creating a highly enjoyable experience for users, delivering 2x higher CTRs compared to the performance of API integrated advertisers.

InMobi’s DMVR approach delivers 2x higher Viewability Rates
By adopting InMobi’s DMVR approach, brand advertisers around the world are able to enjoy 2x Viewability rates of 91% over the MOAT benchmark.

Buying Video Ads Programmatically is the new normal
Advertisers across verticals are adopting programmatic buying to satisfy their need for transparency, efficiency and control. At InMobi, we witnessed 150% increase in spends programmatically over 2016.

THE GROWING VIDEO ECONOMY
VIDEO RISING: 400% GROWTH IN BRAND SPENDS ON MOBILE VIDEO ADVERTISING

- In 2018, mobile ad spending worldwide is estimated to reach $181 billion, a 5000% increase since 2011 alone!
- By 2021, this figure is slated to touch $284 billion, a 60% increase over 2018.

- All in all, by 2021, advertisers and marketers around the world will be allocating approx. 38% of their total mobile advertising to video, up from 1% in 2008.

- To capitalize on this burgeoning set of digital viewers, brand advertisers have increased their mobile video ad spends worldwide with US dominating the spends.

REAPING THE REWARDS WITH MOBILE VIDEO ADVERTISING
VIDEO ADS DRIVE HIGHER USER ENGAGEMENT

- Video ads are the most valuable channel at the available to advertisers today.
- It not only allows for superior storytelling but the interactivity of video ads ensures a higher user engagement delivering above average CTRs compared to Banner Ads.

1.2x HIGHER CTR
OVER NATIVE

4X HIGHER CTR
OVER BANNER

3X HIGHER CTR
OVER INTERSTITIAL

Engagement, as measured by CTR. Video Indexed CTR = (CTR/Global Average Video CTR)*100. The Global average CTR Index = 100.

Based on 2017 data from the InMobi network
ADVERTISERS ENJOY HIGHER RETURNS WITH SDK-LEVEL INTEGRATION

• A video ad that runs on SDK inventory is pre-cached hence reducing video ad-load speeds. Hence it creates a buffer-free user experience, while boasting of higher user engagement and completion rates for brand advertisers. Moreover, with an SDK integration, there is zero chance of fraudulent reporting.

• Advertisers are able to deliver a superior user experience thus enjoying $2x$ higher CTRs when using the an SDK integrated inventory over an API integrated one.

Engagement measured as CTR. Indexed CTR = (CTR/Global Average Video CTR)*100. Global Average Video CTR Index = 100

Integration types can be – SDK, API and Native in-app video.

GLOBAL VIEWABILITY METRICS

- The arrival of MRC’s Viewability Guidelines* provided a single globally accepted definition for mobile video Viewability. As Viewability of ad impressions takes center stage, brand advertisers must demand MRC-compliant metrics for their ad campaigns. Third party verification measurement partners such as MOAT are incorporated directly into InMobi’s SDK resulting in cleaner metrics and the option to optimize the campaign on Viewability metrics.

- InMobi’s DMVR approach delivers 2x better than the MOAT Viewability benchmark for November 2017.
